

Anthracite Region Center for Independent Living ARCIL

Wheels on Wheels W.O.W.

OXYGEN POLICY

Adopted-3/28/2022

The office must be notified of oxygen use upon requesting transportation services. If consumer is a wheelchair user, the oxygen tank must be secured safely to the wheelchair. If consumer is ambulatory and use oxygen the driver must secure the tank while being transported.

Anthracite Region Center for Independent Living ARCIL & Wheels on Wheels W.O.W. is not responsible to monitor oxygen levels or any medically needed service relating to its use. We are a para transit service, so consumers are reminded to make sure their levels of oxygen can sustain them if their trip takes longer than expected.

If consumer experiences a problem with their oxygen while being transported (ex. running out or running low) this service will treat it as an emergency and driver will call 911. Consumer will not be transported home by this service.
